Greetings Marketers,

Welcome to B2C Content Marketing Benchmarks, Budgets, and Trends—North America. This is the companion report to the B2B research we released in September 2017. The data presented in both reports was generated from our eighth annual content marketing survey.

One of our key observations this year is that while B2C marketers reported slightly higher levels of overall content marketing success compared with last year, there was a decrease among those who agreed their organization has realistic expectations about what content marketing can achieve.

A documented content marketing strategy can help, as it sets expectations for what teams should prioritize; yet, only 38% of B2C marketers reported having one.

Our annual research has consistently shown that those who document their content marketing strategy get better results than those who don’t. Another important key to success is an efficient workflow process (page 4 shows how top-performing B2C marketers rate their project management flow and other distinguishing characteristics that set them apart from their peers).

We hope these research findings will be helpful as you consider which content marketing priorities to focus on in the year ahead.

Yours in content,

B2C Content Marketing: 2018 Benchmarks, Budgets, and Trends—North America was produced by Content Marketing Institute and MarketingProfs.

The eighth annual content marketing survey, from which the results of this report were generated, was mailed electronically to a sample of marketers using lists from Content Marketing Institute, MarketingProfs, The Association for Data-driven Marketing & Advertising (ADMA), WTWH Media, and Technology for Marketing (TFM).

A total of 2,190 recipients from around the globe—representing a full range of industries, functional areas, and company sizes—responded to the survey during June and July 2017. This report presents the findings from the 195 respondents who indicated their organization is for-profit in North America, primarily selling products/services to consumers (B2C) or to both businesses and consumers (B2B and B2C), with the percentage of B2C business exceeding 50%.

Note: The B2C content marketers referred to in the base lines and bullet points in this report are respondents who indicated their organization uses content marketing.
