MANUFACTURING
CONTENT MARKETING
BENCHMARKS, BUDGETS, AND TRENDS
Content marketing: A strategic marketing approach focused on creating and distributing valuable, relevant, and consistent content to attract and retain a clearly defined audience — and, ultimately, to drive profitable customer action.

Success: Achieving your organization’s desired/targeted results.

Like everyone else, manufacturing marketers are moving through an arduous year. While they report growing in content marketing maturity, most had to make quick changes when the pandemic hit.

As this annual report shows, 70% of those surveyed changed their targeting/messaging strategy in response to the pandemic. More than half adjusted their editorial calendar (60%), put more resources toward social media/online communities (57%), and changed their content distribution/promotion strategy (51%). Nearly all (91%) expect some of the changes to stay in effect for the foreseeable future.

Most rely on small teams
Most respondents reported that their company has a small or one-person marketing/content marketing team serving the entire organization (60%). Not surprisingly then, 61% outsource at least one content marketing activity — most often content creation.

Among manufacturing marketers who outsource, 61% say it’s a challenge to find partners with adequate topic expertise.

Among those who outsource, their top reported challenge is finding partners with adequate topic expertise (61%). About half report budget issues (53%) and lack of clear return on investment (ROI) metrics (51%).

The importance of digital
The top three types of content that manufacturing marketers use for content marketing purposes are email newsletters (81%), blog posts/short articles (79%), and videos (79%).
Email continues to be an effective way to reach engineers, according to the 2020 Smart Marketing for Engineers report produced by TREW Marketing and GlobalSpec. According to that study, “two-thirds of engineers subscribe to at least three newsletters, with 18% subscribing to six or more.” The study also found that 43% of respondents open most or all newsletters and either read every one or at least scan for content; another one-third of respondents scan subject lines and open the ones that intrigue them.”

Not surprisingly, many manufacturing respondents reported an uptick in virtual offerings. Those now using “virtual events/webinars/online courses” increased to 55% from 39% the previous year.

The Thomas Industrial Survey, May/June 2020 Report, concurs that webinars are becoming more important to industrial professionals. In that study, 35% of respondents indicated that “webinars/virtual events were important avenues to reach new customers after the pandemic began versus 15% before the pandemic began.”

Indeed, when we asked respondents which content types — among all they had used in the previous 12 months — produced the best overall content marketing results for their organization, videos came in at the top, followed by virtual events/webinars/online courses, and email newsletters.

Regarding videos, more than half the engineers/technical professionals surveyed for the 2020 Smart Marketing for Engineers report indicated they spend at least one hour per week watching videos for work (those under 35 and those in the 36 to 45 age ranges reported spending the most time watching videos). It will be interesting to see if those video-viewing hours increase as the pandemic rages on.
Regarding content distribution channels, LinkedIn continues to be the organic social media platform that manufacturing marketers use the most (87%). In addition, 82% used paid channels to distribute content in the last 12 months, indicating social media advertising/promoted posts as the top paid method (79%), followed by search engine marketing (SEM)/pay-per-click (70%). This finding also aligns with the Thomas Industrial Survey, May/June 2020 Report, mentioned earlier, in which 45% of respondents said “digital advertising (e.g., search and social media) was an important avenue to reach new customers after the pandemic began vs. 31% before the pandemic began.”

With so much virtual competition now, we wondered how many respondents’ organizations have established online communities — places where prospects and customers can network and share ideas. Twenty-six percent of manufacturing respondents said yes, they have. Twenty-eight percent said they are likely to within the next 12 months, and 49% said they are unlikely to.

Marketers continue to build trust, loyalty, subscribers
Seventy-eight percent of those surveyed use metrics to measure content performance. Website traffic (87%) and website engagement (82%) are the top two metrics they use.

Manufacturing marketers continue to report success with using content marketing to reach numerous business goals. Examples include:

- Build credibility/trust increased to 74% from 66% the previous year.
- Build loyalty with existing clients/customers increased to 65% from 51%.
- Build a subscribed audience increased to 45% from 32%.
65% of manufacturing marketers surveyed use content marketing successfully to build loyalty with existing clients/customers — up from 51% one year ago.

Most respondents said they went into 2020 with a content marketing budget. However, 31% reported that as midpoint 2020 approached, their organization had decreased content marketing spending. Around half (52%) had made no changes in spending.

Most manufacturing marketers surveyed expected their content marketing spending to stay flat for the rest of 2020.

One in four respondents thought their manufacturing organization would spend more on content marketing in H2 2020 than they did in H1 2020. The majority, however, expected their content marketing spending to stay flat for the rest of 2020.

Looking forward
Regarding their overall success with content marketing over the last 12 months, 30% report their organization has been extremely/very successful, with another 61% indicating moderate success. Sixty-nine percent think the pandemic will have a major or moderate long-term impact on their organization’s overall content marketing success.

69% of manufacturing marketers surveyed think the pandemic will have a major or moderate long-term impact on their organization’s overall content marketing success.

Content creation and website enhancements appear to be top-of-mind for 2021: Three out of four predict their organizations will prioritize both.
The top two predicted areas of content marketing investment in 2021 among manufacturing respondents are content creation (76%) and website enhancements (73%).

When we asked respondents, “What do you think your organization’s biggest content marketing challenges will be during the next 12 months?” many noted content creation in general, as well as getting and keeping their audience’s attention.

“We’re gauging what messages will be positively received by our audience due to the lingering effects of the pandemic,” another respondent added. “We will need to temper messages based on how the global economy recovers.”

“Becoming heard in the ever-growing sea of voices now shifting online is an issue,” one manufacturing marketer said. “Companies still stuck on traditional marketing tactics will see the value in digital and shift their dollars/focus, making it more crowded. We will need clever strategies to stand out in the crowd.”
Manufacturing organizations are growing in content marketing maturity.
Thirty-nine percent of respondents indicate their manufacturing organization is in the sophisticated/mature phase of content marketing maturity, compared with 29% last year.

Most manufacturing marketers adjusted their messaging when the pandemic hit.
Seventy percent of respondents changed their messaging/targeting strategy in response to the pandemic. Far fewer took actions such as revisiting customer personas (19%) and changing their content marketing metrics (13%).

With in-person events on hold, there is a rise in the use of digital content.
The percentage of respondents using virtual events/webinars/online courses increased to 55% from 39% last year. In-person events decreased to 38% from 65%.

A focus on content creation and website enhancements is expected for 2021.
Seventy-six percent of respondents think their manufacturing organization will invest in content creation in 2021. They also expect to see investment in website enhancements (73%).

Manufacturing marketers use content to build trust, loyalty, subscribers.
Three out of four respondents (74%) say they have used content marketing successfully to build credibility/trust in the last 12 months — up from 66% last year. Those using it to build loyalty with existing clients/customers increased to 65% from 51% last year. Forty-five percent report using it to build a subscribed audience versus 32% last year.
Maturity & Strategy
39% of respondents indicate their manufacturing organization is in the sophisticated/mature phase of content marketing maturity, compared with 29% last year.

**Table: How Manufacturing Marketers Rate Their Organization's Content Marketing Maturity Level**

- **Sophisticated**: 6%
- **Mature**: 6%
- **Adolescent**: 19%
- **Young**: 33%
- **First Steps**: 35%

**Key Phases**

- **Sophisticated**: Providing accurate measurement to the business, scaling across the organization.
- **Mature**: Finding success, yet challenged with integration across the organization.
- **Adolescent**: Possessing a business case, seeing early success, becoming more sophisticated with measurement and scaling.
- **Young**: Experiencing growing pains, challenged with creating a cohesive strategy and a measurement plan.
- **First Steps**: Doing some aspects of content, but have not yet begun to make content marketing a process.

39% of manufacturing marketers report that their organization has a documented content marketing strategy, which is nearly the same as last year (41%), but up from 21% two years ago.

- 68% report their organization made major or moderate adjustments to their content marketing strategy in response to the pandemic.
- Many (49%) describe the adjustments as both short- and long-term.
Most manufacturing marketers surveyed agree their organization made quick and effective pandemic-related changes and expect the changes to stay in effect for the foreseeable future.

**Manufacturing Marketers’ Opinions About Changes Their Organization Made to Content Marketing in Response to Pandemic**

- **Our organization made quick changes due to the pandemic.**
  - Strongly agree: 45%
  - Somewhat agree: 39%
  - Neither agree nor disagree: 10%
  - Somewhat disagree: 5%
  - Strongly disagree: 1%

- **Our organization made effective changes due to the pandemic.**
  - Strongly agree: 31%
  - Somewhat agree: 44%
  - Neither agree nor disagree: 16%
  - Somewhat disagree: 9%
  - Strongly disagree: 1%

- **We expect some of the changes we made to stay in effect for the foreseeable future.**
  - Strongly agree: 40%
  - Somewhat agree: 51%
  - Neither agree nor disagree: 7%
  - Somewhat disagree: 1%
  - Strongly disagree: 1%

70% of manufacturing respondents changed their messaging/targeting strategy in response to the pandemic. Far fewer took actions such as revisiting customer personas (19%) and changing their content marketing metrics (13%).

30% of manufacturing marketers surveyed say their organization was extremely or very successful with content marketing in the last 12 months.

**How Manufacturing Marketers Rate Their Organization’s Overall Level of Content Marketing Success in Last 12 Months**

- 61% rated their organization as moderately successful.
- 25% rated their organization as very successful.
- 10% rated their organization as extremely successful.
- 5% rated their organization as minimally successful.

**Note:** None of the respondents indicated their organization was “not at all successful.”

Base: Manufacturing content marketers.

Most respondents went into 2020 with a content marketing budget. As 2020 progressed toward the midpoint, some manufacturing respondents decreased their content marketing spending (31%), but around half (52%) made no changes in their spending.

**2020 Annual Budget for Manufacturing Content Marketing: Pre-Pandemic (Average)**

- 24% Less than $100,000
- 46% $100,000 to under $500,000
- 24% $500,000 to under $750,000
- 3% $750,000 to under $1,000,000
- 1% $1,000,000 or more
- 2% We didn’t have a content marketing budget established for 2020

**Change in Manufacturing Content Marketing Spending in H1 2020 in Response to Pandemic**

- 52% No change in our spending on content marketing
- 31% Decreased our spending on content marketing
- 17% Increased our spending on content marketing

**Note:** The question read: “Prior to the pandemic, approximately how much had your organization budgeted for 2020 content marketing (not including salaries), in U.S. dollars?”

One in four respondents thought their manufacturing organization would spend more on content marketing in H2 2020 than it did in H1 2020. The majority, however, expected spending to stay flat for the rest of 2020.

INSIGHTS FOR 2021

TAKE ACTION NOW

Assess what worked and what didn’t in 2020.

The current environment makes developing a 2021 content marketing plan difficult. “Start by looking at all the things that evolved this year that you want to keep, change, or stop doing. Then ask yourself how you might want to change to prepare for whatever comes next,” says Robert Rose, CMI’s chief strategy advisor.

Continue to build relationships online while in-person events are limited.

With more people working from home, email is an ideal way to communicate. Webinars, videos, networking on LinkedIn, and participating in online communities all present effective opportunities to connect.

Focus on content operations.

It’s not enough to just create powerful content. Content marketers also need to know how content operations work at scale. That means taking advantage of technology, having a content governance process, and knowing how to structure content so it can be reused, repackaged, and leveraged across the organization.

Develop an audience data plan.

Customer data privacy will only become a more important topic as the months go by. It’s crucial to build trusting relationships with prospects, customers, and business partners who willingly give you their data. Ensure that you have processes in place for protecting that data.
This report was produced by **Content Marketing Institute (CMI)** and sponsored by **GlobalSpec**.

The results are from CMI/MarketingProfs 11th Annual Content Marketing Survey. The online survey was emailed to a sample of marketers using lists from CMI and MarketingProfs.

A total of 1,707 recipients from around the globe — representing a full range of industries, functional areas, and company sizes — replied to the survey during July 2020.

This report presents the findings from the 110 respondents who indicated:

- Their organization is a for-profit manufacturing company (85% indicated B2B and 15% indicated B2C, with the majority based in North America).
- Their organization has used content marketing for at least one year.
- They are a content marketer, involved with the content marketing function, and/or someone to whom content marketing reports.

Note: This report contains comparisons with findings from the 10th annual survey — reported on in *Manufacturing Content Marketing 2020: Benchmarks, Budgets, and Trends* — in instances where we observed notable year-over-year differences.

Find all CMI research at [contentmarketinginstitute.com/research](http://contentmarketinginstitute.com/research). Special thanks to MarketingProfs for their assistance with the annual survey and the B2B and B2C reports.
